

RoLiCer Workshop at SKF Engineering & Research Centre

We are pleased to invite you to the RoLiCer Workshop as part of the FP7 project funded by the European Commission Grant agreement 263476 which will take place on **12th -13th Feb 2014** in Nieuwegein.

What:

A research industry workshop on bearings, related R&D and field of competences will be held to share knowledge to ROLICER consortium participants. We would like to encourage young scientists, researchers and students attention and interest in this industrial field.

When:

The workshop will take place on:
-12th Feb 2014, from 13:30 to 17:30
-13th Feb 2014, from 08:30 to 12:30.

Agenda:

The workshop will comprise expert presentations with some time for Q&A on:

- **Steel Fatigue**
- **Bearing Life Rating**
- **Modelling & Simulation**
- **Ceramics & Defects Tolerance in Ceramics**
- **Lubrication & Tribology**
- **Sealing & Seal Modelling**

A facility tour of the SKF Engineering & Research Centre is also part of the programme.

Who should attend this event?

Young scientists and graduates willing to discover the bearing world and its challenges or being active in the following areas:

- Tribology & Lubrication
- Materials
- Modelling
- Bearings
- R&D industrial environment

How to register?

To express your interest in attending this free event, please send an e-mail to Silvia.Veldhuizen@skf.com by **7th Feb 2014**

Please note that places at this event are limited. You will receive a confirmation within a few days after your registration. Travel costs will not be reimbursed.

Venue:

SKF Business & Technology Park
Kelvinbaan 16
NL-3439 MT Nieuwegein
